PROFESSIONAL PROFILE

Senior Full Stack Developer (B2B Freelance Consultant)

Java · Spring Boot · Angular

I help companies and system integrators develop, maintain, and modernize complex web and enterprise applications, delivering solid and production-ready solutions with strong focus on code quality, security, and long-term maintainability.

I have over 10 years of experience on mission-critical projects in banking, public administration, and large enterprises. I operate exclusively as an external senior consultant.

How I can support you

- End-to-end full stack development (frontend, backend, integrations, database)
- Legacy system modernization and technical debt reduction
- Design and implementation of secure and scalable REST APIs
- Digital signature projects, PKI, X.509 certificates, eIDAS
- Targeted interventions on specific tasks, technical backlogs, or production issues
